In The Claims:

Please amend Claims 1, 11, and 24-28 to read as follows:

SUB C1

1. (Amended) Method for searching a database to obtain an object that is related to an indicated object in a document, comprising:

(a) automatically creating a query related to the indicated object, the query having a data structure that is recognizable by a search engine for the database;

(b) providing the query to the search engine, the search engine searching the database for at least one object that is related to the indicated object;

(c) returning the result from the query of the database, the result indicating when at least one object is related to the indicated object; and

(d) producing a display of a related object, so that the related object may be associated with the indicated object.

SUB G57

11. (Amended) The method of Claim 8, further comprising choosing the indicated text in the document for the query of the database from an application program that is separate from another application program that provides the document.

SUB G77

24. (Amended) The method of Claim 21, wherein a navigation component enables the display of a group of related images in a slide show, the group of related images being indicated in the result from the query.

25. (Amended) The method of Claim 24, wherein the navigation component enables another group of related images to be displayed in the slide show, the other group of related images being indicated in the result from the query.

26. (Amended) The method of Claim 24, wherein the navigation component includes a control for determining a period of time that each related image is displayed in the slide show.

27. (Amended) The method of Claim 24, wherein the navigation component includes a control for indicating the number of the related images in the group that is currently displayed in the slide show.

28. (Amended) The method of Claim 25, wherein the navigation component includes a control for indicating each group of related images that are currently displayed in the slide show.
